CARBOLINE.

A Deodorized Extract of Petroleun

AS NOW

Improved Perfected

THAT WILL Hostore Hair on Bald Heads

-18 ABSOLUTELY---

WHAT THE WORLD HAS BEEN WANTING FOR CENTURIES.

From the earliest discovery of petro. to the present day, there has been a strong conviction that the good qualifies of crude oll have not been appreciated, and that it undoubtedly possesses great medical properties. Every one who has handled petrolaum knows what a penetrating, sotire agent it is. It can not be retained in wooden casks at all, unless they are conted with some impervious material, and it is not surprising that it goes right bems to the roots of a person's hair, when it can and its way through the best oak stayes ever made, Its great penetrating powers and its freedom from rancidity are advantages which no other oil possesses in so high a degree, and these same characteristics adapt it to the purposes of a hair restorer and dressing The only objectionable feature being the dark color and offensive odor. But the skill of one of our chemists has overcome the difficulty, and by a process known only to himself he has, after very claborate and costly experiments, succeeded in perfecting CARBOLINE, which renders it susceptible of being handled as daintly as the famous EAU DE COLOGNE. The experiments with the deodorized liquid, on the human hair and skin, were attended with the most asionishing results, and it is now rapidly and surely taking precedence olls as the best preparation the world eve produced for restoring hair on bald heads, and making a dolightful and officient hair dresser. It does not contain a particle of lead, silver, sulphur, or other deleterious drugs. It is a natural product of the earth, containing the elements required by the hair to feed upon. A few applications will show its restorative qualities. Does not se-
